Parassan®

- Non-woven polyester and viscose pads indicated for superficial wounds such as contusions, abrasions, as well as various other dermatological conditions.
- Keeping skin wounds moist.
- Barrier between the wound and the surrounding environment.
- Prevents adhesion between the wound and the dressing.

Parassanet Pads

- Parassanet is the perfect replacement of impregnated gauzes and is manufactured from 100% cotton, this is ideal for the treatment of burn wounds.
- The open weave net allows for the passage of wound exudates to be absorbed by a secondary dressing, avoiding maceration of the surrounding tissue.
- Non adhering to the wound.
- Provides a moist healing environment.
