

## Gowns

**Basic Gown** - Prevents infection from spreading and offers a sterile environment.

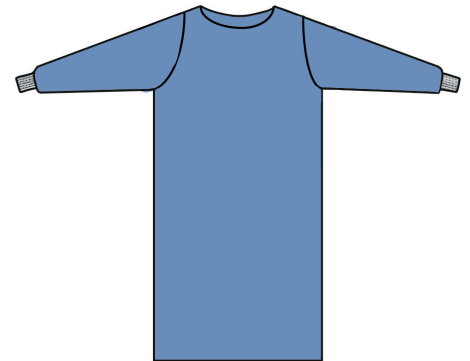

**Standart Gown** - Suitable for short medical procedures with minimal fluid involvement and for treating patients.

**Reinforcement Gown** - Offers a liquid-repellent fabric that is adapted for long procedures involving fluid-intensive environments, such as surgery and catheterization.

**Fully Reinforcement Gown** - A long-lasting gown, offering a high-grade liquid repellent, suitable for long surgeries involving a large amount of fluid.

**Single Use Scrub Suits** - Suitable for the use of the daily use of hospital staff, patients, and visitors. Protects from minimal fluid involvement.
